Arch for sanitation of people

ADI is a **system** for the **sanitation** of people entering and leaving areas sensitive to Coronavirus.

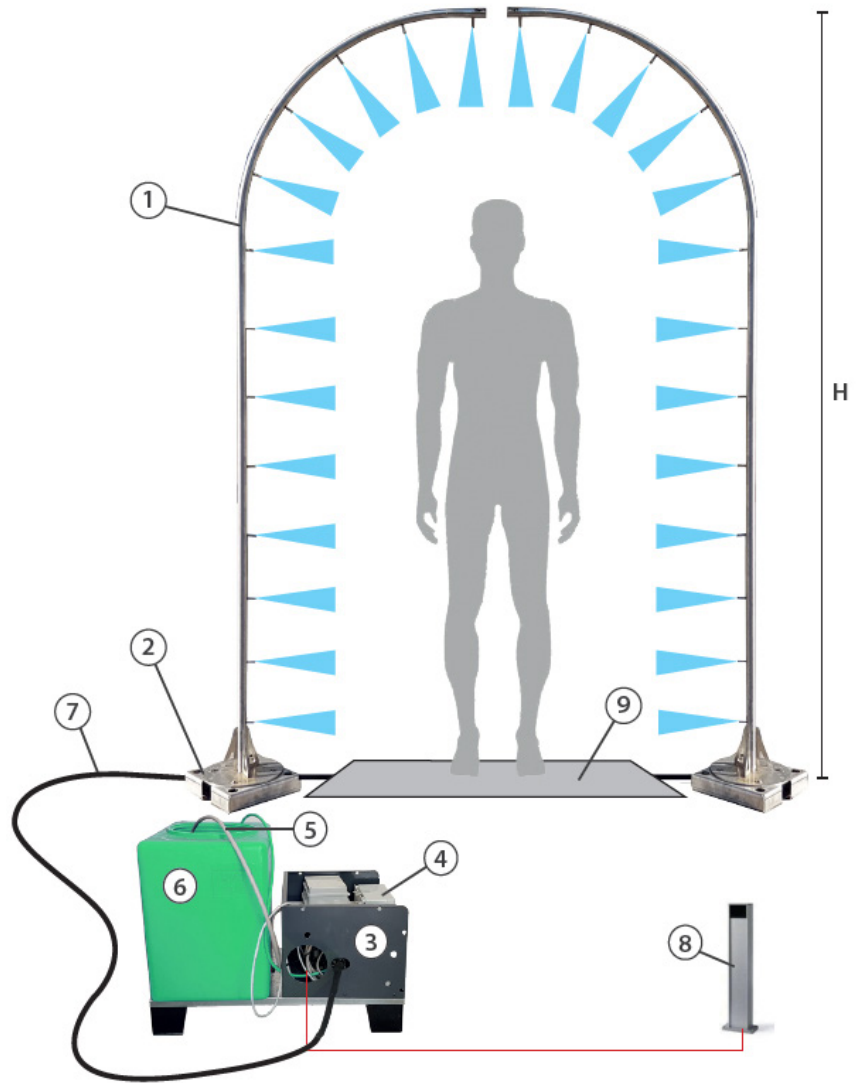

OPERATION

Upon passage, the system automatically starts working and the person who passes between the two semi-arches is affected by the nebulization from head to toe without being wet.

The 10 micron micro droplets penetrate the person's clothes during the passage thus favoring the killing of any coronavirus present.

TECHNICAL DATA

Code	Model	N° Nozzles	Pressure	Air Flow	Drop Size	Power	Size (LxDxH) mm	Weight
ZX.2198	ADI	26	60 bar	1l/min	10mcr	200W (220v-50Hz)	1950x450x(H)2900	40kg

ZX.2198	**1**	Semi arch	2 semi-arches in AISI304 steel (code ZX.6002) with 26 nozzles with diameter ø10mm (13 nozzles for each semi-arch)
	2	Plate fixing	2 plates for fixing the semi-arches to the ground, made of AISI304 steel.
	3	Pumping module	Single-phase 60bar electric pump, 2 pistons, 1l / min.
	4	Electric Panel + programmer	Electric control panel with operating time programmer.
	5	Draft kit	Kit for drawing the liquid from the tank with float for automatic stop.
	6	Tank	50lt container of sanitized / detergent already mixed with water.
	7	Hose kit	Polyamide hose kit (PA12SR), diameter ø 9,6mm, length 25m, black.
	8	Photocell	Start system for 2 photocells when a person passes by.
	9	Platform	Passage platform in plastic.
